## VivaChek™ Ino

Blood Glucose Monitoring System

### © Blood Glucose Target Ranges

Blood glucose values will vary depending on food intake, medication dosages, health, stress and/or exercise. Testing lets you keep track of your results to make daily health and lifestyle decisions to help you manage your diabetes. Ideally, your goal is control your glucose level as close to a normal (non-diabetic) blood glucose level in a safe manner as recommended by your health care professional.

Expected blood glucose levels for most non-pregnant adults with diabetes:<sup>1</sup>

Time	Range, mg/dL	Range, mmol/L
Before a meal	80 - 130	4.4 - 7.2
1-2 hours after beginning of the meal	Less than 180	Less than 10

Consult your health care professional for the target value that is appropriate for you

Reference:

1.ADA Clinical Practice Recommendations, 2021.

### © Testing with VivaChek™ Ino System helps make diabetes easy to control

- HCT** 20-70% Wide hematocrit range
- ✓** Easy and accurate
- MEM** 900-test memory
- 0.5** 0.5 µL blood required
- 5** 5 seconds
- 8** 8 electrodes

### © Optional advanced functions

- 900 meter memory with date and time, 7, 14 and 30 day averaging
